# Step Inside the Most Beautiful Hotel Bathrooms in the World

Of all the spaces to spend time in a stunning hotel suite, the bathroom—with acres of marble and jaw-dropping views—can be the ultimate prize

Today, impeccable hotel decor extends beyond thread count and throw pillows. These seven hotels have captured the spirit and history of their locales and distilled it into

Herculean soaking tubs and beckoning outdoor showers. From soaring views to more square footage than a New York apartment, these hotel bathrooms were designed to impress.

## The Silo Hotel, South Africa

The *hotel exterior* was designed by London-based Thomas Heatherwick, while everything interior was overseen by the property owner Liz Biden. The artwork displayed in each of the 28 individually designed rooms and bathrooms was commissioned for this property. The Victorian bathroom vanities are produced in South Africa using colored glass and chrome. Views are the focal point, thanks to the five-and-a-half-foot-meter convex windows, and throughout you'll find elegant Penhaligon's toiletries alongside cruelty-free, green, and sustainable Charlotte Rhys grooming products.
